Basic - I can use internet, email and write documents	8	34.78%	
Average - I can develop some materials such a simple web pages, capture, create and edit some image, and make reasonable PowerPoint presentations	11	47.83%	
Above Average - I can create some materials such as some edited videos, simple Flash files, Authorware files or other kinds of interactive stuff	4	17.39%	
4. Comparing to other module in my course, in MITE6323 I am learning			
Less	1	4.35%	
Same	3	13.04%	
More	12	52.17%	
Much More	7	30.43%	
5. In this module I am learning			
Theoretical staff that I am not sure how to use in my work, study and elsewhere	2	8.70%	
Similar staff as in other modules	2	8.70%	
New and useful things that I can apply in my work and study and elsewhere	19	82.61%	
6. This module			
Makes me concerned about my technical skills	15	65.22%	

Improves my confidence to use IT	8	34.78%	
----------------------------------	---	--------	--

7. [This module as a whole](#)

Engages me in thinking very little	0	0.00%	
Overloads my mind	11	47.83%	
Makes me think a lot in new and creative ways	12	52.17%	

8. [Resources such as the facilitator's blog, module outline, PowerPoint, reference links and reading material are](#)

Too much and difficult to follow	4	17.39%	
Acceptable	11	47.83%	
Very well organized and useful	8	34.78%	

9. [I think that workload in this module](#)

Too much work and I am not sure why I am doing all this	8	34.78%	
Little or just right	5	21.74%	
Manageable, productive and enjoyable and I appreciate it	10	43.48%	

10. [I find blogs to be](#)

Unnecessary	1	4.35%	
I am not sure what they are about	1	4.35%	
Useful for my learning	21	91.30%	

11. [Other class members are](#)

Indifferent and focused on their own assessment requirement	9	40.91%	
Are supportive and help me in my learning and catching up with things	13	59.09%	

12. [I like to develop](#)

More of my technical skills	9	39.13%	
More of my creative thinking in directions of the module	8	34.78%	
I am happy with current arrangements in this module	6	26.09%	

13. [Overall I am enjoying this module](#)

Less than other modules in the course	2	8.70%	
Same as other modules in the course	5	21.74%	
More than other modules in the course	16	69.57%	

Listed below are the textual responses that were given for the selected question.

Filtered Question: None

23 total survey responses.

14. Any other feedback for improving this module is welcome

I think I can incorporate IT into learning activities in my students in the future. I find my technical mind is not fine enough to do things efficient

coursework is useful. But for part-time students, too heavy to contribute to blog and do the interactive task every week, better reduce weekly task.

Doing a good job already.

My IT skill is poor. It is very difficult for me to master a new software in a short period of time. Workload is heavy.

The workload is a bit too much for me as the standard of expected outcome is very high. I think I can't manage the technical skills.

I really enjoy this module. I have learnt a lot, such as the creative thinking and the IT skill. However, the workload is too heavy.

I enjoy this class. Materials usefulinsightful. Homework thoughtfully planned (progressed in stages challenging).Makes me want to read blogs daily.

I would like to have more readings as I want to get more knowledge about this module, however, the weekly tasks are difficult and time-consuming though I enjoy the process of the learning. I don't just have my IT skills improved, but without good knowledge about the couse.
